Things you need to know

* Actual speeds will be less. Speeds may vary due to congestion, distance from the cell, local conditions, hardware, software and other factors.

The upgrade software is not Mac compatible. If you are running your TMB device on a Mac operating system, you can upgrade your device on a Windows PC. When the upgrade is complete, the device will be enabled to take advantage of the increased speed on Mac operating systems.

1 Min cost is \$1,416 plus usage.

2 Unlocking fee applies.

3 Unused data allowance expires each month. Excludes some services such as content.

If you use Telstra WIFI with a Data Pack, standard Telstra Wireless Hotspot charges will apply.
